DETAILED ACTION

Allowable Subject Matter

1. Claims 1-17, 41 and 42 are allowed.

The following is an examiner's statement of reasons for allowance: The primary reasons for the indication of the allowability of claims 1-17, 41 and 42 are:

Regarding claims 1-17, the prior art does not teach or fairly suggest in combination with the other claimed limitations a conductive filler material dispersed within the electrically insulating material in quantity sufficient for the disc to maintain an electrostatic charge.

Regarding claim 41, the prior art does not teach or fairly suggest in combination with the other claimed limitations a conductive filler material dispersed within the electrically insulating material in quantity sufficient for the disc to maintain an electrostatic charge and an adapter having an annular groove in an exterior portion thereof for maintaining the wildlife guard upon the adapter.

Regarding claim 42, the prior art does not teach or fairly suggest in combination with the other claimed limitations a conductive filler material dispersed within the electrically insulating material in quantity sufficient for the disc to maintain an electrostatic charge and an adapter having an annular groove in an exterior portion thereof for maintaining the wildlife guard upon the adapter.

These limitations are found in claims 1-17, 41 and 42, and are neither disclosed nor taught by the prior art of record, alone or in combination.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Response to Arguments

2. Applicant's arguments, see the Amendment filed on September 10, 2004, with respect to claim 1 have been fully considered and are persuasive.

In response to the applicant's argument the Examiner agrees that neither the combination of Williams et al (US 5,864,096) in view of Soens (US 4,664,971) nor the cited prior art disclose, teach or suggest a wildlife guard having a conductive filler material dispersed within the electrically insulating material in quantity sufficient for the disc to maintain an electrostatic charge.
